

Designed to clean the built-up acrylate coating in fusion splicer v-grooves, this double-ended brush is the perfect tool to clean and maintain fusion splicers. This brush also features the following:

- Angled stainless steel bristles on one side of the brush scrape any hard-to-clean debris out of v-grooves
- Nylon bristles on the other side of the brush gently push debris out of the way
- Stainless Steel housing for long life and durability
